

Sean Scott Resume

I am an aspiring Full Stack Web Developer wanting to expand my knowledge within my new career. My background in Web Development is in the infant stages but that just gives me more room to grow. I have learnt many skills in my past careers which I believe will assist me greatly in the Web Development environment. I am a proven hard worker and plan to do the same in my Web Development career, a career where I can be proud of my work and goals achieved. I started my journey in Web Development through a Monash University Bootcamp and I am slowly but surely making my way through this new and crazy world. Naturally I am a curious person and that strives me towards always wanting to learn more. I am always grateful to receive any feedback and hope we are a successful fit where we can both mutually benefit from each other.
